

Agency: Environmental Quality

Where to Get a Radon Test Kit

SOURCES OF RADON TEST KITS

"Do-it-yourself" radon test kits can be obtained from the agencies on the following list. These kits include the test device, postage to mail it back to an out-of-state lab, and the fees for having the device analyzed and a report sent back to you.

Test devices might also be available from some hardware stores or home improvement centers, but be sure to read the package so you know what you're getting! Many include postage and lab fees in the purchase price, but not all.

Test kits may also be purchased online at <http://mi.radon.com>, or from other online vendors.

If you prefer to hire a professional testing service, contact your local health department and request a copy of the Radon Measurement Service Providers list or visit the [Radon Testers and Mitigators](#) page.

ALCONA - District Health Department #2
